

Jerry Felix

Backend Developer

[G-mail](#) | +91 93453 64086 | Thanjavur, Tamil Nadu
[LinkedIn](#) | [GitHub](#) | [Codeforces](#) | [portfolio](#)

Backend Developer with 2.7 years of experience developing scalable backend systems and AI-powered applications. Skilled in building enterprise software, designing distributed architectures, optimizing data-intensive workloads, and implementing intelligent solutions using modern AI technologies.

Experience

Sardonyx Technologies Pvt. Ltd Backend Developer

Jun 2024 – Present

- Developed and maintained 10+ backend services supporting enterprise security applications using ASP.NET Core and React.
- Designed, developed and deployed secure RESTful APIs using ASP.NET Core and Golang, enabling scalable enterprise integrations.
- Improved search response times by 40% through Elasticsearch optimization and Kafka-based event-driven processing.

Sardonyx Technologies Pvt. Ltd Trainee Backend Developer

Oct 2023 – Apr 2024

- Completed a 6-month intensive technical training program focused on real-time backend development.
- Built strong foundations in .NET, REST API design, SQL optimization and debugging.

Notable Achievements

Optimized PostgreSQL query performance and introduced ClickHouse for analytical workloads, significantly improving large-scale data processing efficiency.

Designed and implemented Elasticsearch-based search capabilities for querying and retrieving large volumes of structured and unstructured data with low latency.

Refactored backend services through technology migration and data pipeline implementation, enhancing system scalability, maintainability and overall performance.

Implemented RBAC, structured logging, and security hardening practices supported by SAST and DAST security scans for mission-critical enterprise applications.

Projects

EBuy Ecommerce Application

Live - <https://ebuy-fawn.vercel.app/>

- Built a responsive ecommerce web application using React.
- Implemented reusable UI components and optimized client-side performance.
- Automated deployment using GitHub and Vercel CI/CD pipelines.

AI Developer Agent

70% Complete

- Developing a backend-first AI agent for automated code generation and task orchestration.
- Integrating semantic retrieval pipelines using embeddings and Qdrant vector search.
- Exploring multi-agent collaboration and tool-calling capabilities.

AI Personal Assistant Agent

40% Complete

- Architecting an intelligent assistant That Can Think, Act and Respond.
- Implementing long-term memory and contextual retrieval mechanisms.
- Designing workflow automation and adaptive execution pipelines.

Skills

ASP.NET Core

Entity Framework Core
